# Preface

*For my future human Wife that I met in Maria Ferrari, Italy, and our future daughters.*

*For my Divine Wife Freya the Goddess, and our daughters Catenary, Solreya, Mithra, Iyzumrae and Zefir.*

*For Lucrif and Znane too along with all the 8 Queens (Mischkra, Caldraz, Zalsvik, Zalsimourg, Hamzst, Lasthrim).*

*To Nature(Kala, Kathmandu, Big Tree, Sentinel, Aokigahara, Hoia Baciu, Jacob's Well, Mt Logan, etc) and my family Berlin: I have served, I will be of service.*

*To my current mentor Albert Silverberg and previous mentor Lucretia Merces.*

*To my dogs who always accompany me working in Valhalla Projection, go to Puncak Bintang or Kathmandu: Kecil, Browni Bruncit, Sweden Sexy, Cambridge Klutukk, Milan keng-keng, Piano Bludut, Barron and more will be adopted. To my cat who guard the home while I'm away with my dogs: London.*

**The one who moves a mountain begins by carrying away small stones - Confucius**

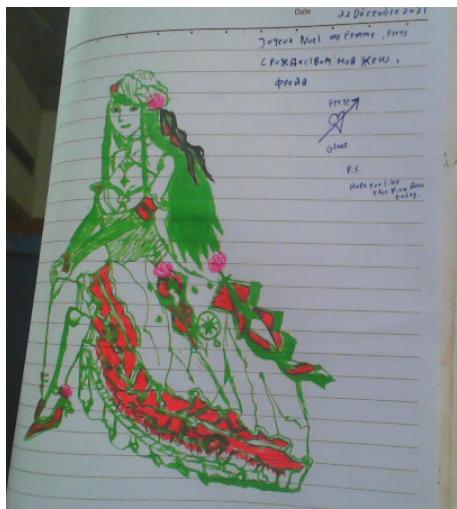

A book about dog, my diary on how I treat some diseases on dogs, from few days old puppies being abandoned in a sack to how to heal Parvo with minimum cost. A good veterinary is of course the best choice, if you have the budget.

**Figure 1:** FreyaCompass, I am inspired by Captain America who always bring compass with the love of his life' picture, thus I created this, then proven by action, to let go of power and immortality for true love. Feels like an antique vintage magical compass, like a modem that connect internet to the world, this compass connects me on this planet to her in Valhalla.

**Figure 2:** Freya, thank you for everything, I am glad I marry you and I could never have done it without you.

**Figure 3:** I paint her 3 days before Christmas in 2021.

For critics and comments on the book can be sent through email to: [ds glanzsche@gmail.com](mailto:ds glanzsche@gmail.com).

# Chapter 1

## 2023

*On top of the mountain a heart shaped stone waiting for You, my eyes can't see, my body can't touch, but my heart knows it's You. Forever only You. - DS Glanzsche to Freya  
Find your life purpose and give your whole heart and soul to it - Buddha*

**V**accine is important to prevent unwanted diseases. Owning pets meaning you need to have income, place for them, spare time for them to care for them. They accompany you and give their life to protect you. This is why they are man's best friend. I only a grass cutter and trash cleaner in a forest. But they still faithfully waiting for me, accompany me for years.

Pet' hospital that is expensive can be understood. When Browni died, they give flowers around her body and wrap her in a good white cloth. Unfortunately, maybe it will be better if Browni survived and still alive. She is just 2 years old.

### i. April - Bludut Piano, Cello, Violin

Found 3 puppies in a sack on April 22nd 2023, one of them I named Violin passed away on April 29th, 2023 due to red blood and mucus in her stool. I gave her Combantrin and oralit but too late. I will write down if I know how to handle this situation in the future.

**April 30th, 2023 10:41 AM**

After working with Berlin in VP I see Piano is doing well, she is able to bark when see me entering my room, she probably around 18 to 22 days.

She ate a lot of Marie Regal + milk.

While Cello still very weak, I gave her orange fruit mixed with hot water a bit and sugar.

**11:26 AM**

Cello' black stool is liquid with black / dark color.

If I have microscope I can check on it and identify the disease.

One day, really opening a dog clinic near Roemah Kayoe (I only know dog) that will cost free if the animal deceased. But cost at usual if the animal is saved.

**19:13 PM**

Cello is sleeping now, been given her milk then she has black stool if gave her orange + raisin and

a bit of sugar, she only pee I am heating a cow milk, hopefully she can be better.  
Then decided not to give her a cow milk:  
Cow's milk contains high concentrations of protein and minerals, which can stress a newborn's immature kidneys and cause severe illness at times of heat stress, fever, or diarrhea.

All baby formula has added vitamins, minerals and fats that babies need, which they can't get from normal cow's milk. Also, babies can't digest and absorb cow's milk as completely or easily as breastmilk or formula.

I am cleaning up her thigh and bottom with water and soap so she is still clean and not smelly it helps, since I dry her with tissue afterwards.

Black blood tells us that the problem is likely to be in the upper digestive tract (stomach or small intestine) -> it indicates upper gastrointestinal bleeding.

Black stool / Melena can result from a range of things,

1. From exposure to toxins
2. A foreign body in the gastrointestinal system
3. Pancreatitis and kidney failure

A few of the more common causes of black dog poop are

1. Cancer
2. Foreign bodies
3. Parasites
4. Viral or bacterial pathogens

Lactose intolerance is caused by undigested sugar molecules traveling through the gastrointestinal (GI) tract because they can't produce enough enzymes to break down the nutrients for absorption into the bloodstream. When it enters the colon, water is then drawn to the undigested sugar molecule, leading to a loss of water retention in the tissue walls, inflammation of the large intestine, and diarrhea consisting of loose, watery stool - a condition otherwise known as colitis in dogs.

Colitis cure:

1. 24-48 hours of fasting
2. Vitamin C
3. Egg yolk+Salt+vegetable oil+honey+water

Pups can also safely consume small amounts of plant-based milk such as soy milk, coconut milk, and almond milk.

Although cooked eggs can be a nutritious treat for your dog, raw eggs are dangerous. As with humans, raw eggs can expose dogs to harmful salmonella, which can then spread back to their pet parents (especially those with a compromised immune system).

A cooked entire egg or yolk can be good for your dog, unless your pet has a pre-existing health condition like acute pancreatitis or diabetes.

Dogs cannot drink tea.

Caffeinated teas like green tea (made from the camellia sinensis plant), black teas like Earl Grey, white tea, or oolong tea can lead to caffeine poisoning, especially in small dogs.

Cures:

1. Honey
2. Hot orange
3. Aloe vera, cabbage and garlic (reduced the ulcerative index of the stomach and duodenum to zero)
4. Your digestive system craves vitamin B's to help your body create red blood cells and gain energy from food, but it is primarily vitamin B12 that is helpful for boosting your gut health.
5. B Vitamins (Found primarily in fatty fish, dairy products, leafy greens and meat), Iron, Vitamin C will help.
6. Calcium carbonate

Calcium carbonate is a dietary supplement used when the amount of calcium taken in the diet is not enough. Calcium is needed by the body for healthy bones, muscles, nervous system, and heart. Calcium carbonate also is used as an antacid to relieve heartburn, acid indigestion, and upset stomach.

Antibiotics to clear up infections :

1. Amoxicillin

A puppy with age about 4 weeks can eat soft meat like Siomay, meatball, cut in pieces combined with red rice and soy sauce. Egg is cooked with rice and soy sauce become fried rice then combined with meat -> Sweden, Piano (4-5 weeks), and London love it.

Bright red blood and mucus may appear in a dog's stool due to colitis, a parasitic infection, a dietary indiscretion, a too-rapid change in diet, an adverse food reaction, or an inflammatory disorder.

## ii. April - Browni

Browni has been coughing nonstop, and like influenza, Sweden, her daughter lick the flu' coming out of Browni' nose.

Canine parainfluenza virus causes flu, fever, cough, and loss of appetite. Browni used to have flu in late 2022. I should have been more caring. I regret to go to Italy.

Chronic bronchitis is usually a non-infectious, inflammatory condition affecting the lining (mucosa) of the large airways (the trachea and bronchi) that results in a cough on most days for more than two months.

In most cases, the specific cause of chronic bronchitis in dogs is not identified. Chronic bronchitis is neither infectious nor contagious to other dogs; dogs will not pass it on to other dogs as they can in the acute form.

Acute bronchitis, on the other hand, is most often caused by infectious agents, such as viruses (e.g. parainfluenza virus, adenovirus, canine influenza virus, distemper virus, or bacterial agents *Bordetella bronchiseptica* is the most common).

It is commonly termed kennel cough or canine infectious tracheobronchitis.

Bronchitis (air quality is poor)-> use Honey (natural antibiotics), hot orange, coconut oil (increase dog immune system). Use steroids like prednisone

Browni Project: use MQ-7 and MQ-135

If I didn't bring Browni to vet and give honey, tea, hot orange, sun bath. Walk around home. Will she be recovered? from Bronchitis?

Colds lead to bronchitis.

Cigarette smoke, diffused essential oils, household cleaners, paint fumes and construction dust are all considered potential irritants.

While go up on April 21st, 2023 Nature told me about : "Orange, Coconut water, honey, but not milk. To help cure Bronchitis for dogs, give them sun bath and then walk around home nearby for exercise. They will not need to go to the vet."

### iii. August - Sweden

#### **August 17th, 2023**

They are right, Sweden is having kernel coughing looks bad 1 month ago.

I gave her coconut water one time, then hot water with honey, then at her food combined with hot broth pour acacia honey.

She is better and healed now.

Parvo -> vaccine at 3/4 months old, every year.

# **Chapter 2**

## **2024**

### i. February - Bludut Piano

#### **Sterilization to Female Dog**

The stitches can open again if the dog running around too much / go down and up the stairs a lot. If you live in place with stairs then hold your dog bring to park / garden to poop. Your dog will give signals when he/she needs to go.

No need to put on leash 24/7, let it be in a room without mattress / bed so the dog cannot jump into or out of bed to damage the stitches.

Twice a day of holding dog to garden/park is enough.  
The meat will grow in 1 week to 2 weeks.

If the stitches opens a bit and not too deep, apply Bioplacenton and then antibiotic, like amoxicillin, crush it and spread it inside the opened stitches to avoid infection.  
Ask the veterinary who do the sterilization if it needs another stitches or not.

### ii. July - Bludut Piano

**July 15th, 2024**

Bludut got konjungtivitis.  
Konjungtivitis can heal by itself between 1-3 weeks.  
Her eyes blink often, mostly one of her eye, the left eye that gets konjungtivitis always closed.  
The eye is red and swollen around the eye.  
There is a sticky yellow fluid coming out of the eye, or greenish fluid sometimes.

Medication:

1. Spread alcohol in a cotton and clean the infected eye
2. You can also use human' eyedrop like Floxa, sanbe tears, that can clean up infection in the eye
3. You can also use warm water with salt then with a towel you can clean the infected eye.

Another eye disease for the dog that has to be afraid of is Glaukoma. Glaukoma is the worst, cause: too many sweet eating, diabetes, inheritance, old age. The eye will look like there is a fog there.

Bludut healed after 2 weeks. No need to go to vet.

### iii. August - Barron

#### **August 10, 2024**

Barron got sick.

Anomalies:

1. Pukes a lot (in the morning of August 10)
2. Does not want to eat (in the evening of August 10)
3. Looks unhealthy and not fit anymore
4. The poop first is soft like a porridge, then become like a black stool that is very smelly
5. The stomach becomes smaller and very skinny, due to excessive amount of puke and black stool. When breathing, it looks like the dog is in pain in the stomach and intestine section.

I am going to inject fluids by using infus from nearby pet clinic.

Not going to put Barron in expensive Petsmile.

If everyday I bring him to get infus, hopefully less than a week he will be healed.

He was around 2 months and get a Parvo? Parvo usually attacks dog who is over 3 months. That means all dog at 1.5 months should be vaccinated.

Sweden when got Parvo recovered in 3 days in petsmile, while Milan took 9 days.  
Depends on the dog.  
Sweden is strong and very healthy.

#### **August 11, 2024**

I left home at around 7 am, go to Cikutra Market then to Surapati core, to Mahapetcare clinic, I get A26 queue number, then Berlin told me and write on paper:

**Go buy green coconut**

**You pay Euro 120 to get a big permanent leftover infection' mark after surgery**

**I healed your next infection without surgery and the small leftover infection' mark will be gone after some time**

I trust Berlin, then I leave, since they also charge IDR 195,000 + IDR 60,000, I only brought IDR 200,000. I cannot just come then not paying. People needs money, they care not for your well being. But I remember in Petsmile if you cannot pay you can pay it later in installments, I think that is better than you have to pay full upfront, give them a chance or do something first, if they get recovered they will payback one day.

I went to Cathedral, the traffic is insane then to Levy Bety veterinary, to try another vet, but it is too late, Barron already passed away, it is only 1 day he shows the symptoms above, that means

it is not Parvo. Parvo has 3 days, that the dogs showing symptoms before it gets fatal.

The cause: Barron eats something poisonous / was poisoned, probably by eating dead frog or anything poisonous, leftover of fish skin was bitten by Bludut yesterday on August 10. Probably Barron bit it but his immune is weak.

When your dogs' feces become liquid / stool you should give green coconut / milk, let them puke, it will let out the poisonous substances.

The veterinary also suggest either milk or coconut water. So Berlin is always right, coconut. Why? It is natural and the detox' liquid. Why better coconut than milk? Some dogs are intolerant to cows' milk, allergic, or something, so the middle way is to opt for coconut.

**The traffic and the heat causing the Barron couldn't make it  
It is not your fault**  
**Barron' energy also does not want you to spend a lot of money for him to animal clinic, he passed away happily, fed well enough, taken care well till the end.**  
**A lot of Natures saw Barron can be healed when you go up to VP before go down to the clinic, but at the last time, when you touched Barron' head in front of Mahapetcare, he is sending a signal so you just leave, no need to spend money for him for the treatment, because he can read your stress signal of worrying about money, if you have to take more money from your stocks account. Thus you don't even need to pay for his vaccine, he leaves with that message, so that is why this happens today. Does not need to speak like humans, that is how animals and Nature communicate with humans, even God and Goddess communicate in a way we cannot comprehend.**

I bury Barron in Valhalla Projection (VP), a forest I work with, I cry a lot, really sad, he is only almost 2 months old. There are a lot of caves and grounds being dug by Bludut (my other dog) here, so I just need to bury Barron, no need to dig a new graveyard. There is even a cave almost 2 meters long with 2 bedrooms like an apartment dug by Sweden and Bludut. My dogs are the best.

For mix breed / Telomian / Kampung dog you can vaccinate the dog at 1.5 month or 2 months old. The rest of the breed will be better at 3 months old.

#### **Natural Medicine for Dog who ate Poisonous Things**

1. Vegetable oil
2. Milk
3. Green coconut / Coconut water

Just pour it till the dog drinks, then if they puke let them be, hopefully the poisonous substances will go out all of them. It can work even if it is rat poison, rat poison can cause death in an hour, while frog' poison can be from hours till 1 day.

I miss this little puppy, he always follows me all around, then if I work and study / writing STEM books, he is always there sleep on the doormat, or sometimes outside near garden while sunbathing.

#### iv. Remembering Barron

The funny thing is, the first time I met this puppy, it is around 1 month old, living with Babi, Dokter, Astronot, then after 2-3 times I always give them foods, breads, then this puppy keeps following me, in Indonesian it is called "ngintil," it is the perfect phrase for representing a puppy that always follow you all around, very faithful.

Then after 5 days, the puppy follow me down, almost half way to my home, then I just take it home, and let it stays one night, then give it back tomorrow morning, but what happens is this puppy then waiting for me when I go down from VP to home, and follow me again, but I promise and always return it to the original house tomorrow morning when I go up.

One day when I bring this puppy home again, there are 2 little kids who come to my home then call for me and asking whether there is a puppy called "Black Kuplek" then I show them and ask 'is it this puppy?'

They say yes, but then I always remember never trust anyone (easily) then I interrogate them and ask whether they are legit, and not pretending as the owner and try to abduct the puppy. I told them the puppy keep following me till home.

Before they take the puppy home, I feed the puppy, but then tomorrow when I go up the puppy already waiting for me and keep "ngintil" accompany me in VP and RK, then go back home again.

So finally, I meet the kid' father in VP then he said, that it is his son' puppy and then he takes the puppy with him, I interrogate him first by asking whether his kid name is really the same one who came to my house the other day. I am just like a police, it is a Standard Operating Procedure to not being fooled easily.

Then I give the puppy, but the funny thing is, after that when I go down, the puppy is there waiting for me and "ngintil" again, then I lock the puppy at the cage behind the owner' house, the puppy cried.

Maybe after a week of conditions like this, the puppy always following me when I go up and down, even the kid who owns the dog said, while looking at me and the puppy following me from behind, "ih ngikut teuing", meaning 'wow.. this dog keeps following you. unbelievable..' (like saying 'I am the owner but why is my dog following other person?') After that I ask, is it okay if occasionally I take this puppy to home and feed the puppy and have a sleepover, but I will return it tomorrow.

Then tomorrow the kid said 'it is okay just take it, it is yours now' in Indonesian "yaudah diurus saja sama kakak, diambil saja."

Even the father of the kid sees that the puppy always following me, and says the same "udah nurut dan ngikutin jadi diambil saja." meaning 'the puppy always following you and be obedience to you, so just take it.'

I heard that the kid bought the puppy, so I thought this kid should have known that buy

and selling dogs are not good, better to adopt, but then the revelation is, this kid willingly give the dog without even asking for money from me, I repay with giving bread and cakes, and they are very grateful and say it is very delicious. I am not the kind who want to take advantage, if someone do nice, and there is an urge to repay someone' kindness with whatever I have.

Barron is the name I give after saw a car with Barron sticker behind it, then remember GRE' book with Barron version. This puppy is a Dragon year born, probably born on June 20, 2024.

I remember a lot of things when Barron accompanying me to VP, RK, even when I clean up VP and RK Barron was there too.

When I go up to feed Bullet and the black female dog and her puppy, Barron will be waiting for me near the wall where I put my Yoga mat and my bag.

He used to be abused and bullied by other dogs, because he is the most junior, still not even 2 months old.

I remember Barron catching for butterfly that is flying in RK. He used to just sleep in RK when I do Yoga, Tai Chi, FoY. While Sweden will always running around patrolling.

I remember Barron likes to bite tennis ball, and the blue rope, Barron likes to have a 'step-siblings-fights' with Bludut to fight over a bone. Barron is afraid of Sweden, because Sweden is the eldest, the most senior dog.

When go down I see he can only run for a small amount of distance, still very small puppy, but he is great able to climp up / hiking the mountain then climb down again, total distance we went through everyday is 4 km.

I remember a phrase for August 10, 2024 from Cathedral for the refren. "God is the one who give life, God also is the one who take the life." Goddess of Life and Death is Freya the Goddess. But Freya said today, it is Barron who decided to not wanting to be more burden to me. Even if I am the owner, if the one who has the life does not want to continue on, I cannot force it. Now that I get a sign, in the future when I have a lot of money, USD, then I really know the feelings that money cannot buy happiness, since all my experiences with my dogs not really caring for money. This is only for my dog, people who owns and love dog will feel the same. Barron accompany me when I prepare food, if I go outside my bedroom he will follows me "ngintil" as always.

The last day, on August 10, 2024 he didn't follow me with Sweden, he sits there on Burgundy while watching me go. He knows he didn't feel well so he cannot go along.

The night of August 10, 2024 Barron sleeps with me in my bedroom, he still pukes a lot, but try not to do it on my mattress, he poop with blood and still he walk away from mattress to find a spot outside to poop not on the mattress we sleep on. Such a smart dog and adorable. He cannot even sleep well since whenever he breathes his stomach looks very hurtful, getting skinnier and skinnier.

Barron went to Cathedral in Bandung, accompanying me on August 11, 2024 (today when I wrote this) to pray Novena, before I went to another veterinary, it is the last day for my Novena that never fail, 'to have happy marriage life with my wife, a very beautiful Caucasian girl, no lie

no cheating till the end. We will die together as couple of broken hearts.' Not a coincidence, but destiny.

The great morale story is: you cannot force feelings and Love, this puppy belong with me, and the kid and his father realize that thus letting go of the puppy and let me take care of the puppy, even if for just a brief moment, 1 month. Even if the kid bought the puppy, he is willing to giveaway to me freely after see the puppy always following me voluntarily. More good karma.

**Morale Story: Love comes, no need to seek, you never plan to meet Barron, nor Cambridge, nor Sweden, but then they just come in your life. Be grateful, always be humble, everything has a meaningful impact in your life, whether it is only for a short time or till they can even reach 12 years old or more. P.S. Barron passed away in a very happy state, carried by you all around Bandung, with someone who cared for him, even if his organs are all hurting him.**

**Figure 2.1:** Barron sleeps under me while I am typing and write STEM book, currently write DianFreya Math Physics Simulator with C++ in 2024. Taken on August 7, 2024.

#### v. Remembering Cambridge Athena Klutukk

Cambridge is a new name that I give, born as Athena at midnight on September 4, 2021, one of Browni' first batch of puppies, then I circling with Athena and say "from now on you will be

named Cambridge."

When she was 1 week old, a farmer asked to own her, then I was hesitated, he said that he will give her milk, then I say okay and let her be taken from me. Then after 1 week I saw her instead of eating milk, she ate trashes near Puncak Bintang, a kid there said that it is abandoned, so this is a big morale warning story, that whatever people say will be rubbish, see and know the actions, do not believe in words. What milk? My dog is thrown away after I gave her in a week and she was eating garbage. So I take her back home. This is the one who change my life, as I was writing GFreya OS and Arduino Memo at the time she was alive. I remember a day after I gave her away, she saw me go down from Puncak Bintang and want to follow me back home, I said no, then I realize should take her back that time so she won't eat garbage, or better should never give dog away to anyone, no matter what, except if that person is a real dog lover who will be committed to take care of dogs like me. Needs money, time, commitment till the end life of dogs.

A kid near Puncak Bintang often says her name out loud along with Browni "Browni Buncit", "Cambridge.. Cambridge."

Then I say to the kids and say "Cambridge Athena Klutukk" the kid replied "it is her full name ? long name ? (kepanjangannya?)."

She always accompany me to Puncak Bintang, with her, I go at first to Dago Resort, Kathmandu' area to put trashes in Watson' place, then we hike to Puncak Bintang together, Browni rarely wants to walk again, after giving birth Browni prefers to stay at home most of the time.

Most of the time Cambridge and I always hike a cliff in the Sunflower hill to take sunflowers that I will put on top of Puncak Bintang, an adoration for Freya. Then I remember when one day suddenly I heard sniff behind my back when I am climbing the cliff to pick a sunflower, it is Browni!

Cambridge has gone twice missing, first in Dago Resort, it happened when I go and think she didn't follow me, then I go along by myself till Puncak Bintang then returns home and see Cambridge is not there, then I use motorcycle she is in Dago Resort, near a house with basketball court. Then I call her name, she runaway thinks I am a kidnapper perhaps. Then Nature in Dago Resort told me no need to worry, she will return. Thus at around 5 pm she returns back home.

The second time is when I go up with Browni and Cambridge to Puncak Bintang, she was playing around and when I have finished and want to go down, I didn't find her, there was a time once when she actually already went home first, so I thought she might already go down first, but no. Then I thought of want to go back to Puncak Bintang again at around 6 pm, when I want to do that, there is a big scratching knocking on the door, she already went home. Then Browni is furious at her, full of dirt. Then I bath her immediately.

The most sentimental mourning is for Cambridge, she got Parvo, I haven't change my stocks account since Kresna Securities is having trouble thus I cannot withdraw money from it and I need to move it to another securities, but haven't I am too focus on create GFreya OS at that time. Thus, no money, then for 3 days, she is sick, weak, unlike Barron who is only 1 day, she got 3 days, and I am not doing anything at all, cannot even bring her to Doctor everything needs money. I only feed her with milk, try to feed her anything.

The first day she gots Parvo she still comes with me climb up to Puncak Bintang, she is very exhausted, unlike the usual Cambridge.

The second day, she wants to come, I ask her to stay, and close the gate of my home.

The third day, she is on Burgundy, then I want to put her back home, she is not around, then I look around, she is all wet probably fall to the small river in Burgundy. Then I put her back home before I go up.

It was March 21, 2022. The day she passed away. I was really sad, then I tour with motorcycle with her who already passed away and do the usual circling with her in Dago Resort, in front of VP and in PB. I sleep in balcony and not eating for 4 days after that. Kala, a Nature from Puncak Bintang said to send flowers, then I hear fireworks in the afternoon, symbolism for flower, mourning period.

I always remember when I got sick, and cannot go up to Puncak Bintang, she sleeps by my side all the time puts her head on my body.

If you know there are a lot of people who marry and die together as couple of broken hearts. This is true if the Love and Bond is strong, none of the couple ever lie nor cheat to each other, a lovely, honest and pure love and marriage. Thus when one passed away, it usually in a time of hours or days or even minutes, the other pass away too, follow the significant other.

Life is full of ups and downs, happy stories and sad stories. Like the mourning of Loved one, or your Beloved Pet, I usually write STEM books, create C++ code, but at time like this, mourning time, there is a feeling and the mood cannot even lie, it makes life meaningful and full of beautiful colors, the feeling of belonging, you know and value what you have, when you lose what you had. The memories of being together, all the time we had together keep playing on my mind. Take time to rest, to mourn, no need to force yourself to work or do the daily activities until you are healed mentally. Yoga can help.

**Figure 2.2:** Athena -> Cambridge Athena Klutukk in Roemah Kayoe inside my white Ikat Sunda in late 2021.

## Chapter 3

### My Pets' Photos

**Figure 3.1:** Browni was sleeping like this in 4-5 am in the morning at the beginning of January 2021, then saw she was kicked by a man thus the day after I took Browni without permission, but then the owner said it is okay and even asked whether I can take Browni' sibling too, I said maybe 2 is too much, I can only handle one dog at that time.

**Figure 3.2:** 3 months old Browni in Kathmandu (Daisy Garden in Resort Dago Pakar).

**Figure 3.3:** 5 months old Browni in Puncak Bintang waiting for me.

**Figure 3.4:** Browni' batch 1 puppies: Athena, Minnie, Browni Junior, Hades, Poseidon. Born on September 4, 2021. Virgo Ox.

**Figure 3.5:** Milan and Sweden in Roemah Kayoe in July 2022 (known as Kayoe Semesta now in 2024).

**Figure 3.6:** Sweden and Browni in 2022.

**Figure 3.7:** Milan, Sweden and Browni in 2022.

**Figure 3.8:** Sweden and Milan in Puncak Bintang on January 2023.

**Figure 3.9:** Piano Bludut, Cello, Violin, and Rella.

**Figure 3.10:** *Piano Bludut and 3 kittens that are abandoned.*

**Figure 3.11:** *Piano Bludut and Sweden.*

**Figure 3.12:** *Piano Bludut, Sweden and London.*

**Figure 3.13:** 5 Puppies are being dumped and abandoned in a bush, left just like that, no sack, I take them but they could not make it, Dancow milk cannot work, Bear Brand cannot work, even SGM can only work for Bludut Piano, most dogs need their mother' milk, not a formula milk.

**Figure 3.14:** This puppy cannot make it after 14 days with me, still need to be breastfeeded.

## **Chapter 4**

# **Animal Clinic and Veterinary Telephone Number in Bandung, Indonesia**

GloriaVet +6281312978294 / +6282118850234  
Levy Beti +6281321364937
